

**Connect with your customers
quickly using professional
photo inspections.**

Professional Inspection & Selling Tools

/// Auto Serve 1

Creating Trust at the Point of Decision™

How It Works

Digital inspections with photos increase trust with your customers. Advisors have an easier time selling work when customers can see what technicians see. Repair shops using AutoServe1™ see an **increase** in their average repair order of up to **15% or more**.

Technician

Performs tablet-based inspections on every vehicle to capture all required repair work.

Advisor

Automatically builds professional looking customer reports with all the inspection findings. Sends out to customer.

Customer

Receives their custom vehicle report and reviews it on their computer/phone with or without the advisor.

Consistent Inspections

Perform consistent professional inspections, reduce interruptions and fully service every vehicle coming through your door.

Create Trust

Vehicle reports with photos help customers better understand why services are being recommended.

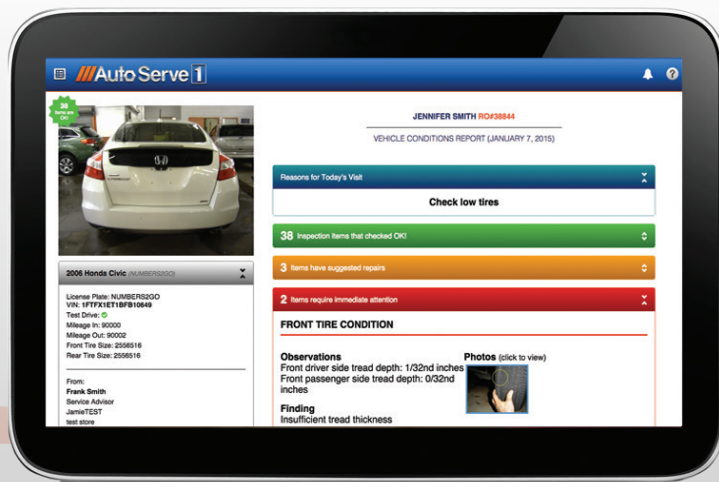

Increase Orders

Confident customers making well-informed decisions will purchase more services recommended by advisors they trust.

Make it easy for customers to approve repair orders

"Our professional customer reports with pictures deliver great wow factor and make it so much easier to build trust and stronger client relationships. It's one thing to find all the work a vehicle needs – it's another for my customers to actually understand what we're recommending. Since using AutoServe1™, our ARO is up 17% and my team and customers love it."

Darin Esau, OK Tire™ - Linden, AB

Start using AutoServe1™ in your shop today!

AutoServe1™ offers you leading technology to make it easier for customers to approve repair orders while increasing your ARO.
